

SS SAFE START FORMULA

brant gamma photo

Sentinel® Safe Start, a Nutrient Release Formula feed, is the new generation in equine nutrition formulated specifically to meet the high demands of foal growth and mare lactation. A high protein and high fat formulation utilizing low starch/sugar ingredients provides the precise nutrition necessary for healthy foal growth, premium milk composition and optimum milk production in mares. This unique formulation of Sentinel® Safe Start is also recommended for show horses on low protein hay or when extra shine and condition is desired. A pressure-cooked feed offers a safe and natural way to provide essential nutrition and calories to young growing foals and lactating mares and is easily digested for optimal nutrient utilization.

GUARANTEED ANALYSIS

Crude Protein, Min.	16 %
Lysine, Min.	0.85 %
Methionine, Min.	0.45 %
Threonine, Min.	0.55 %
Crude Fat, Min.	8.5 %
Crude Fiber, Max.	10 %
Calcium, Min.	0.65 %
Calcium, Max.	1.15 %
Phosphorus, Min.	0.70 %
Copper, Min.	55 ppm
Manganese, Min.	140 ppm
Selenium, Min.	0.60 ppm
Zinc, Min.	170 ppm
Vitamin A, Min.	5,500 IU/lb
Vitamin E, Min.	150 IU/lb
Biotin, Min.	0.45 mg/lb
Total Omega-3 Fatty Acids, Min.	3.5 g/lb
Total Omega-6 Fatty Acids, Min.	21.0 g/lb
Total Bacillus Species, Min.	454 million cfu/lb
(Bacillus Licheniformis, Bacillus Subtilis)	

1 qt = 0.85 lbs

Immune System Support – Antioxidant nutrients aid in the development of a healthy immune system in young growing foals. These nutrients also sustain tissue integrity and strength helping to support mammary health in lactating mares.

Growth and Development – Amino acids such as Lysine, Methionine and Threonine are the building blocks of quality protein necessary for growth and maintenance of all tissues including bone, muscle, hoof and hair. Protein is also important for milk production in lactating mares.

Body Structure and Function – Biologically available minerals and vitamins help grow and maintain all body tissues, help regulate metabolic activities and help support the immune system to sustain overall health. Precise mineral nutrition and balance is important for mare milk composition and proper bone development in growing foals.

Low Starch and Sugar Ingredients – A low starch and sugar diet is often recommended by veterinarians and nutritionists for horses with a history of metabolic and digestive challenges, such as Cushing's, insulin resistance, tying up, DOD, EPSM, colic and laminitis.

Healthy Rate of Intake – The light and airy nature of pressure cooked feeds may facilitate the breakdown of feed for horses while encouraging slower consumption and more thorough chewing. A slower rate of intake with more complete chewing may help minimize the risk of digestive upsets, such as colic and choke.

High Nutrient Density – Provides more actual nutrition by weight; you may feed less while delivering more of what your horse needs for optimum health and ideal body condition.

Stable Digestive Environment – Direct-fed microorganisms and fermentation products aid in maintaining healthy digestion and active microbial fermentation for sustained nutrient digestibility, absorption and assimilation. These additives may support the presence of beneficial bacteria in the gut, resulting in sustained horse health and a more stable digestive tract environment.

Built-In Fiber – Highly fermentable fiber sources such as soybean hulls, rice bran and beet pulp support healthy digestive activity while providing extra calories in a safe and natural form.

Healthy Skin and Hair Coat – Highly digestible fat from Soybean Oil and Flaxseed (sources of Omega-3 and Omega-6 fatty acids) helps provide extra calories for maintaining ideal body condition and helps promote a healthy skin and hair coat.

Brain and Visual Support – Docosahexaenoic Acid (DHA), an Omega-3 fatty acid, is a structural component of nerve cells in the brain and eyes and a key component of heart tissue. Studies have shown that DHA is important for mental and visual development and plays a key role in the anti-inflammatory process.

Fixed Formula – A consistent formula, bag after bag, featuring only the highest quality ingredients, to prevent sudden changes in the diet to improve digestive health and function.
